Step 1& 2 After progeam file

Step 3: Build Docker Image

Open PowerShell in project folder:

docker login   # only if you have Docker Hub account

docker buildx build -t mywebapp:1.0 .

- **Wait for Node image and project layers to download.**

Step 4: Run Docker Container

docker run -d -p 3000:3000 --name mywebapp-container mywebapp:1.0

- **Open browser → http://localhost:3000 → Your app appears.**

Step 5: Check Running Container

docker ps   # list running containers

docker logs mywebapp-container   # see logs

Step 6: Stop / Remove Container (Optional)

docker stop mywebapp-container

docker rm mywebapp-container
